

EUROSTEEL 2008

**5th European Conference on
Steel and Composite
Structures**

Graz, Austria

Volume A

Contents

Invited lectures

The basis for semi-continuous composite construction

David A. Netherof

Eurocode 3: Design of steel structures - Present status and further developments 11

F.S.K. Bijlaard

The free form design (FFD) in steel structural architecture - Aesthetic values & reliability 23

Massimo Majowiecki

Chapters of volume A

Cold formed sections 39

Composite bridges 147

Composite construction 243

Connections 423

Dynamics 705

Eurocodes 753

Fatigue 827

Glass 917

Chapters of volume B

Fire 947

High strength steel 1083

Plates 1149

Practice 1191

Refurbishment 1245

Seismic 1293

Shells 1491

Stability 1545

Steel bridges 1695

Steel frames 1737

Strength 1801

Cold formed sections

Tests and design of stainless steel lipped channel section columns <i>Barbara Rossi, Jacques Rondal, Serge Cescotto, Kim J.R. Rasmussen</i>	39
Deformation capacity design of stainless steel lipped channel columns <i>Barbara Rossi, Kim J.R. Rasmussen</i>	45
Application of the direct strength method to stainless steel lipped channel section columns failing by combined distortional and flexural-torsional buckling <i>Barbara Rossi, Jacques Rondal, Kim J.R. Rasmussen</i>	51
Direct strength method compared to EN 1993-1-3 - Design concepts for thin-walled plain channels in coupled instabilities <i>Bettina Drune, Dieter Ungermann</i>	57
Nonlinear analysis of thin walled cold formed steel platforms <i>Konstantinos Tzaros, Euripidis Mistalddis, Phillip Perdikaris</i>	63
Performance of built-up cold-formed steel beams assembled with mechanical and laser welded connections <i>Raffaele Landolfo, Gianmaria Di Lorenzo, Francesco Portioli, Maria Rita Guerrieri</i>	69
Behaviour of continuous purlins of lapped cold-formed Z-sections and bolted on intermediate supports <i>Viorel Ungureanu, Dan Dubina</i>	75
Experimental procedure, modeling the distortional behavior of Z-purlins in sandwich panel roofs <i>Mircea Georgescu, Viorel Ungureanu</i>	81
Rotational restraint by profiled sheeting - An extensive set of Peköz tests validating existing numerical models <i>Luc & hueremans</i>	87
Deep trapezoidal sheeting with perforated webs - An experimental research program <i>Sándor Ádány, Mansour Kachichian, László Dunai</i>	93
Moment distribution on continuous beam from corrugated sheeting <i>Aleš Ješek, Tomáš Vraný</i>	99
Non-linear curling in cold-formed steel panels <i>Nuno Si/vestre</i>	105
GBT stability analysis of a slender LiteSteel beam section member <i>Pedro D. Simão</i>	111
The effect of mode coupling on DSM - Parametric studies on the buckling resistances of various cold-formed cross-sections <i>Sándor Ádány, Zoltan Beregszászi</i>	117

	III
3D frame structure consisting of cold formed Z-sections - Theoretical versus experimental behaviour on full-scale tests	123
<i>Luc Schueremans</i>	
Design of Z-purlins: Part I - Basics and cross section values according to EN 1993-1-3	129
<i>Jorgen Robra, Gerald Luza</i>	
Design of Z-purlins: Part 2 - Design methods given in EN 1993-1-3	135
<i>Gerald Luza, Jorgen Robra</i>	
WiSH: Workpack design for steel house - The new European easy-to-use tool for cold-formed steel building design	141
<i>Natividad Pastor, Christine Etzenbach</i>	
Composite hridges	
Viaduct over river Ulla in the HSRL "Eje Athintico" in Spain	147
<i>Francisco Millanes, Luis Matute, Miguel Ortega, Jesús Martin, Diego Pajueo, Carlos Gordo</i>	
Viaduct over the Nalón River (Spain) - A new experience with "strict box" composite bridges	153
<i>Julio Martinez Cañon, Álvaro Serrano Corra, Carlos Castanon Jimenez, Miguel Gomez Navarro</i>	
Design of a composite road bridge with high strength steels and ultra-high performance fiber reinforced concrete	159
<i>Aude Pete, Ludovic Picard, Florent Imbert, Joël Raoul</i>	
New technology in composite bridge-building	165
<i>Istwin Szatmari, Tibor Szatmari</i>	
Structural analysis of composite cable-stayed bridges - From construction to failure	171
<i>José Oliveira Pedro, Antonio Reis</i>	
Consistent analysis method for long term effects in composite bridges	177
<i>Dorian Janjic, Johann Stampfer, Heinz Bokan</i>	
Bridge and soil interaction	183
<i>Jaromir Krizek, Jiri Studnicka</i>	
Composite bridges with integral abutments	189
<i>Danie Pak, J. Naumes, Markus Feldmann, Oliver Hechler</i>	
3D FE-modelling of beam-to-beam composite joints - Application to the design of joints with cover-plates in continuous composite beams	195
<i>Samy Guezouli, Sao Serey Kaing, Oliver Hechler, Alain Lacha</i>	
Connection degree in composite continuous beams - Influence on the bending moment capacity	201
<i>Samy Guezouli, Mohammed Hjjaj, Quang Huy Nguyen</i>	

Innovative solution of continuity for composite bridges - Numerical investigation of an experimental specimen	207
<i>Hugues Somja, Sao Serey Kaing, Aloin Lachal</i>	
Experimental study on slim composite girder for short and medium span bridges	213
<i>Ryuichi Mina/a, D. Uchida, K. Kobayashi, T. Hasegawa, Akimitsu Kurita</i>	
Fatigue strength of grouped shear studs	219
<i>Osamu Ohyama, Nobuhilo Okubo. Akimitsu Kurita</i>	
Connection flexibility effects in steel-concrete girders according to in-situ tests of a road bridge	225
<i>Czesław Machelski. Robert Toczkiwicz</i>	
An improved model for the analysis of composite steel-concrete slab-and-beam structures	231
<i>Evangelos J. Sapountzakis, V.G. Makos</i>	
Failure probability based on LRFD and ASD methods - Design of two-span continuous composite two-plate-girder highway bridges in Japan	237
<i>Toshiyuki Sugiyama, Junji Yoshida</i>	
 Composite construction	
Shear force capacity of a crown dowel- Models for calculation	243
<i>Thomas Pejraschek, Josef Fink</i>	
Experimental analysis of T-perfobond shear connectors for steel and composite structures	249
<i>Juliana da C. Vianna, P.c.G. da S. Vellasco, L.F. Costa-Neves, S.A.L de Andrade</i>	
Experimental and numerical investigation of perforated shear connector for composite structures	255
<i>Peter Chromiak, Jiri Studnicka</i>	
Monotonic and cyclic behaviour of shear connectors	261
<i>Adrian Ciutina, Aurel Stratan</i>	
Failure mechanism and shear strength of grouped arrangement of headed stud connectors	267
<i>Jun Okada, Teruhiko Yoda</i>	
Shear connection by transverse rebars - Shallow floor composite beams	273
<i>Maui V. Leskela</i>	
Force transfer in concrete-filled steel tube columns	279
<i>Uwe Starossek, Nabil Falah</i>	
Seismic behaviour of through plate moment connections - Analytical study of their usage in concrete-filled steel tube column frames	285
<i>Meisam Safari Gorji</i>	
Numerical model of the ultimate behaviour of SHS-CFT columns	291
<i>Luigi Mastrandrea, Rosario Montuori, Vincenzo Piluso</i>	

High strength concrete filled tubular columns - Behaviour of slender columns under eccentric loading	297
<i>Jose M Porales, Manuel L. Romero. J.L. Bonet. A. Hospitaler</i>	
New test data, production and testing technologies of composite concrete-filled steel tubes	303
<i>Ar/iamas Kuranovas, G. Sauciunenas, D. Zabulionis</i>	
Composite members of annular cross-sections - Prediction of structural compression resistance and reliability	309
<i>Audronis Kazimieras Kvedaras. Antanas Kudzys</i>	
Ductility of partially encased composite members under combined loading conditions	315
<i>Ahmed E/ghazouí, Jason Treadway</i>	
Experimental study of composite column-wall systems subjected to combined loading conditions	321
<i>Bernhard Hauke. Max Gündel, Renala Obiala</i>	
Economic application of composite beams with moderate high strength materials	327
<i>Bernhard Hauke</i>	
Composite beams in partial shear connection with standard or non-standard shear connectors	333
<i>Roland Biirli. Mario Fontana</i>	
Composite beams with web openings subject to axial load	339
<i>Mike Banji</i>	
Development of a new composite cellular beam	345
<i>Olivier Vassarl. L.G. Cajol. J.P. Muzeau</i>	
Composite deck slabs with light weight aggregate concrete	351
<i>Trung Luu. E. Bonolo. X. Keslemon. B. Parmenier. M. Br;ol. J. C. Grass</i>	
Static and dynamical performance of semi-continuous composite floor system	357
<i>Tiago J.L. de Olive;ra. Eduardo de M. Batisla</i>	
Failure assessment of composite slabs under idealised fire conditions	363
<i>Katherine Cashell. Ahmed Elghazouli. Bassam Izzuddin</i>	
Composite slabs with reinforcement from steel conugated sheets - Design and tests	369
<i>Eduard Airumyan. Andrey Pavlov. Andrey Boyars/dy</i>	
Behaviour of steel concrete composite beam models in bogging moment regions	375
<i>Abdul Qader Me/hem</i>	
Revisit of section classification requirements for composite girders under positive flexure	381
<i>Yoshiaki Okui. Vivek Kumar Gupta. Masatsugu Nagai</i>	
New simplified analytical method for the prediction of global stability of composite sway frames	387
<i>Lam Ly. Jean-François Démonceau, Jean-Pierre iasparl</i>	

Analysis of shear connection distributions in continuous steel-concrete composite beams	393
<i>Andrea Dall'Asta, Graziano Leoni, Alessandro Zona</i>	
Analyses of the deflections of composite girders	399
<i>Frank Bohme, Jorg Lange</i>	
Nonlinear F.E. analysis of composite beams	405
<i>Quang-Huy Nguyen, Mohammed Hjiqj, Brian Uy, Samy Guezouli</i>	
Analysis of composite steel-concrete beams with a family of interface elements	411
<i>Joao Batista Sousa Jr, Amilton Rodrigues do Si/VG</i>	
The unilateral contact problem in composite slabs	417
<i>Themistokis Tsalkati, Aris Avdelas</i>	
Connections	
Design of semi-rigid steel-to-concrete joints	423
<i>Ulrike Kuhlmann, Rolf Eligehausen, Markus Rybinski, Stefan Fichtner</i>	
Anchor plates with headed studs in concrete columns - Improvement of load bearing capacity in design	429
<i>Stephan Fromknecht, Christoph Odenbreit</i>	
Steel bonded anchors behaviour analysis - Application of these anchor types in some concrete steel joints	435
<i>Miroslav Bajer, Štěpán Řepa, Jan Samal</i>	
Stiffness and strength of CHS column bases	441
<i>Ireneusz Ligocki</i>	
Recent developments on composite connections - Behaviour of joints subjected to sagging bending moments and presentation of a free design dedicated software	447
<i>Jean-François Demonceau, J.P. Jaspart, R. Kinkhammer, R. Oerder, K. Weynand, F. Labory, L.G. Cajot</i>	
Static and cyclic loading tests of a composite joint - Commentary on the testing of a full scale slab and composite beam to column specimen	453
<i>Ivor Ryan, Daniel Bitar</i>	
Steel-concrete composite joints for buildings - Theoretical and experimental study under symmetrical and asymmetrical loads	459
<i>Daniel Dan, Valeriu Stoian, Tamás Nagy György, Cosmin Dăescu</i>	
Advanced numerical modelling of composite steel concrete joints	465
<i>William Bessa, R. M Gonçalves, L. Calado, CA. Castiglioni</i>	
Experimental analysis of composite semi-rigid beam to column joints	471
<i>Fernando Ramires, A.L. de Andrade, P.C.G. da S. Vellasco</i>	

Thin end-plate beam-to-column composite Joints - Experimental investigations of the behaviour of steel-concrete joints	477
<i>Wioleta Barcewicz, Marian A. Gizejowski</i>	
Steel beam-to-column bolted joints with thin end-plates - Experimental investigations and finite element modelling	483
<i>Marian A. Gizejowski, Wioleta Barcewicz</i>	
Full scale tests on bolted connections - Tests on beam-to-beam end-plate connections under bending	489
<i>Levente Katula, László Dunai, Péter Márai</i>	
Eurocode based studies on bolted T-stub moment resistance beam-to-column joints	495
<i>Nauzika Kovacs, Roberto T. Leon</i>	
Nonlinear elastic-plastic 3D Finite Element Modelling - Top and seat angle connections with double web angle	501
<i>José Manuel Reinoso, Alfonso Loureiro, Ruth Gutiérrez, Aícia Mareno</i>	
A numerical survey on bolted T-stub connections with various hole clearances	507
<i>Ioannis Raftoyiannis</i>	
Prediction of ultimate behaviour of bolted T-stubs - Influence of bolt preloading	513
<i>Vincenzo Piusa, Gianvittorio Rizzano, Riccardo Sabatino</i>	
Influence of preloaded bolts on constructions with semi-rigid connections	519
<i>Gerd Wagenknecht</i>	
On the verification of hollow section joint resistances	525
<i>Rolf Kindmann, Matthias Kraus, Jan Vette</i>	
Analysis of joints created from various types of sections	531
<i>Pavol Beke, Vincent Kvočák</i>	
Full scale subassembly experiment on wide flange beam to RHS column connection using plug weld	537
<i>Isao Kohzu, Takeshi Murai</i>	
Performance of an I-beam to SHS-column by T-stub bolted steel frame connection	543
<i>Kagan Yemez, Gulay Aljay</i>	
Resistance of a square hollow section face in bending	549
<i>Kagan Yemez, Gulay Altay</i>	
Finite Elements analyses of welded T-joints	555
<i>Arlene M.S. Freitas, Francisco Mendes, Marcilio Freitas</i>	
CHS gusset plate connections analyses - Theoretical and experimental approaches	561
<i>Arlene M.S. Freitas, Doniello G.V. Munchillo, Ivo A. V. Requeno, Aníbal H.M. Araújo</i>	
Beam-to-beam joints with bolted end-plate connections concerning steel platforms Angra 2 NPP	567
<i>Luci D. Gonzalez de Lema</i>	

Simplified method for design of bolted connections based on Eurocode 3 <i>Sándor Fernezelyi</i>	573
Evaluation of the complete moment-rotation curve of bolted beam-to-column connections using mechanical models <i>Minas Lemonis, Charis Games</i>	579
Predicting moment-rotation behaviour of connections - An analytical and experimental study of flush end plate connections <i>John Mativo, Kuniei Nogami, Tetsuya Yamasawa</i>	585
Experimental investigation of welded beam-to-column joints <i>Davor Skejic, Darko Dujmovic, Boris Androic</i>	591
The influence of structural details on the dissipative behaviour of beam-to-column joints <i>Fabio Iannone, Vincenzo Piusa, Gianvittorio Rizzano</i>	597
Cyclic model of beam-to-column joints <i>Massimo Laour, Vincenzo Piusa, Gianvittorio Rizzano</i>	603
Testing program to evaluate behaviour of dual steel connections under monotonic and cyclic loading <i>Don Dubina, Nicolae Muntean, Aurel Stratan, Daniel Grecea, Raul Zaharia</i>	609
Particular features of application of component method to bolted beam-to-column joints of pitched roof portal frames with class 3 and 4 sections <i>Mircea Cristutiu, Daniel Grecea, Don Dubina</i>	615
Component method for connections with thernal separation <i>Zuzana Šulcová, Zdeněk Sokol, Frantisek Wo/d, Roman Rabenseifer</i>	621
Defonnation capacity and ductility demand of steel connections at ambient and elevated temperature <i>Nor Hajizah Ramli Sulong, A. Y. Eighazouli, B.A. Izzuddin, N. Ajit</i>	627
Using perfonnance-based design to evaluate moment resistant steel structures with combinational columns <i>Javad Razzaghi, Elias Safarpour Ciashi</i>	633
Comparison between PTED beam-to-column connections based on numerical analyses <i>Matteo Esposito, Beatrice Faggiano, Federico M. Mazzolani</i>	639
Innovative joints with post-tensioned cables and dampers - Analytical and numerical modelling <i>Emanuele Maiorana, Carlo Pellegrino, C/audio Modena</i>	645
Innovative connection in tubular steel towers - Experiments on segment specimens under static loading <i>Wy/liam Husson, Milan Veljkovic</i>	651
Interaction curves for non-preloaded bolted connections in tubular members <i>George Stamatopoulos, John Ermopoulos</i>	657

Initial stiffness of flange bolted joints and their influence on the behaviour of steel chimneys	663
<i>Aleksander Kozłowski, Andrzej Wojnar</i>	
Prediction of ductile/brittle failure of steel joints - Behaviour of welded beam-to-column joints under cyclic loading	669
<i>Vasilis Karlos, Andreas Spiliopoulos, Ioannis Vayas</i>	
Finite element analysis of strengthened panel zones - Welded steel beam-to-column joints under unbalanced loading	675
<i>Ghandi Loho, Alain Lachal</i>	
Partial safety factors for resistance of net cross-sections with accidentally eccentric holes	681
<i>Franc Sinur, Darko Beg</i>	
FE modelling and analysis of stainless steel bearing type bolted joints	687
<i>Julien Averseng, Abdelhamid Bouchair</i>	
Long bolted joint of high strength steel members	693
<i>Vac/av Hat/man, Jakub Dolejs</i>	
Riveted connections in historic metal structures - An experimental study	699
<i>Moria D'Aniello, Luigi Fiorino, Francesco PorfioU, Raffaele Landolfo</i>	
Dynamics	
Design concept for composite members subjected to impact and blast loads	705
<i>Max Giindel, Falko Bangert, Alexander Britner, Ahmed Elghazouli, Bernhard Hauke, Benno Hoffmeister</i>	
Modal testing and analysis of steel railway bridges - Influence of the ballast superstructure on the dynamic properties of a full-scale bridge model	711
<i>Tobias Miihr, Jose!Fink</i>	
Dynamic response of filler beam bridges during train transit	717
<i>Johann Stampler, Dorian Janjic, Andreas Domaingo</i>	
Response of bridges to steady and random wind load - Wind analysis of the Hardanger suspension bridge	723
<i>Andreas Domaingo, Johann Stampler, Dorian Janjic</i>	
Design guide for floor vibrations	729
<i>Oliver Hechler, Markus Feldmann, Christoph Heinemeyer, Flavio Galanti</i>	
Dynamical behaviour of long span joist floors submitted to human rhythmic activities	735
<i>Rogério R. de Almeida, José G.s. da Silva, Pedro e.G. da S. Vellasco, Sebastião A.L. de Andrade, Luciano R.o. de Lima</i>	
Nonlinear vibration analysis of pitched roof steel frames	741
<i>Alexandre Galvão, Ricardo A.M. Silveira, Paulo B. Gomes</i>	

Finite element modelling of wind turbine tower structures <i>Alan do S. Sirqueira, Pedro C. G. do S. Velasco, José G.s. do Silva, Luciano R.o. de Lima, Sebastião A.L. de Andrade</i>	747
Eurocodes	
Numerical validation of the General Method in EC3-1-1 - Lateral and lateral-torsional buckling of non-uniform members <i>LiJiana Marques, Luis Simoes do Silva, Carlos Rebelo</i>	753
Portal frame with complex boundary conditions - Comparison of general method with traditional methods according Eurocode 3 <i>Andreas Lechner, Richard Greiner, Joachim Lindner</i>	759
EC3 safety checking of compact I-section beam-columns - Influence of the beam-column support conditions on the interaction formulae performance <i>Paulo Mendonça, Dinar Camotim</i>	765
Discussion on member imperfections according to Eurocode 3 for stability problems <i>Rolf Kindmann, Christian Wolf, Judith Beier-Tertel</i>	773
Dispensing the lateral-torsional buckling calculations in steel beams at room temperature and in case of fire <i>Nuno Lopes, Paulo Vila Real, Luis Simoes do Silva</i>	779
Design of fixed circular arches with tube cross-sections under concentrated loads according to EC3 <i>Christoforos Dimopoulos, Charis Gantes</i>	785
Development of risk acceptance criteria for the design of steel structures <i>Peter Tanner</i>	791
Safety of lightweight steel roofs exposed to snow load <i>Milan Holický, Miroslav Sykora</i>	797
Applications of methods of design assisted by testing <i>Marcela Karmazinová, Jindřich Melcher, Zdeněk Kala</i>	803
Statistical evaluation of material characteristics and their influence on design strength of structural steels of S355 <i>Jindřich Melcher, Zdeněk Kala, Marcela Karmazinová, Miroslav Fajkus, Lubomír Rozlivka, Libor Puklický</i>	809
The Eur-mg project - A case study for structural steelwork design under the Eurocodes <i>Miguel A. Serrano-López, C. López-Colina-Pérez, Sue E. Armstrong, Jorg Lange, Fernando Gonzalez</i>	815
EQUESTA - Electronic, quality assured, European steel training and assessment for steel design and construction <i>John Moron, Graham Owens, Christine Roszykiewicz</i>	821

Fatigue

- Statistically founded fatigue strength values of riveted members - Classification of constructional details** 827
Andreas Taras
- Fatigue resistance of typical structural detail of riveted steel bridges 833
Josef Vičan, Joze Gocal, Srants/av Meliš
- Static and fatigue tests of crane bracket joints 839
Levente Katula, Harlmu/ Pasternak
- Fatigue classification of trough deck plate joints in orthotropic steel bridge decks 845
Benk Ko/stein
- Early fatigue damage and repair of steel orthotropic plated bridge deck 851
Philippe Van Bogaert, Hans De Backer
- Improving the fatigue resistance of steel tubular arch bridges by diaphragm stiffening 857
Philippe Van Bogaert, Lien Verberckmoes
- Fatigue strength improving methods for welded flange attachment joint with gap 863
Masahiro Sakano, Ken/ara Matsumoto, Shuji Yajima, Kiyonobu Sakashita
- The examination of retrofit of the existing orthotropic steel decks which does not need traffic restriction 869
Yoshihiko Takada, M Sakano, Y. Nishigaki, Y. Sakai
- Fatigue damages on orthotropic steel decks and their retrofit measures in Hanshio Expressway 875
Akiko Tabala, Yasumoto Aoid, Yoshihei Horie, Takashi Nakashima
- Adoption of Ultrasonic Impact Treatment (UIT) - Design of steel structures with enhanced fatigue life 881
Peter Gerster, Robber/ de Ridder
- Performance prediction of torsional bracings using strictly in-situ based loading impact 887
Rober/ Veit-Egerer, Helmu/ Wenzel, Josef Fink
- A user-friendly design method for the webs of economic-fabrication steel bridge girders 893
Miroslav Skaloud, Marie Zörnerová
- Energy approach to the life time identification - Welded connections 899
Emilia Juhásová, Marián Vrabc
- The fatigue and mechanical properties of steel** 905
Romua/das Kliukas, Mindaugas Leonavičius, Stanis/av Stupak
- Crack resistance of welds of various types 911
A/gimantas Krenevičius, Mindaugas Kazimieras Leonavičius, Rimantas Stonkus

How to join steel and glass - Complex adhesive behaviour	917
<i>Anneliese Hagl</i>	
Connections of glass structures by used shear bolts in a row	923
<i>Radim Vend, Martina Eliášová, Michal Netušil</i>	
Experiments of glass structures subjected to bending	929
<i>Lucie Hermanowł. Morlína Eliášová, Michal Netušil</i>	
Wind effects on glass-aluminium façades - A comparative study of code provisions	935
<i>Konstantinos Cha/Zinikos. C.C. Baniotopou/os. T. StQ/hopoulos</i>	
Implementing a thennal activation system into a light-weight steel deck element	941
<i>Herod Daring, M. Feldmann, M Kuhnhenne, J. Hellberg</i>	

Volume B

Fire

- Unprotected composite frames with CHS columns - Performance under **fire** loadings 947
Elisabetta Alderighi, Jean-Marc Franssen, Walter Salvatore
- Full scale test of a steel and concrete composite floor exposed to ISO fire and corresponding numerical investigation 953
Bin Zhao, Mohsen Roosefid, Olivier Vassart
- CFD and FEM coupling for fire resistance evaluation - Combining FDS and ANSYS codes for the **fire** resistance assessment of steel structures 959
Bin Zhao, Sylvain Desanghere
- Unrestrained beam under natural fire test 965
Jiří Chlouba, AnOnin Uhlir, Zdeněk Sokol, František Wald
- Column temperature during localised fire test 971
Petra KollerovQ, Nicolas Bonnet, Zdenek Sokol, František Wald
- Steel beam-columns subjected to fire - Parametric analysis of the overall buckling behaviour 977
Markus Knobloch, Moria Fantana, Andrea Frangi
- Comparison between EC3 and the original proposal for beam-columns in case of fire 983
Didier Ta/mona, Nuno Lopes, Paulo Vila Real, Sylvie Castagne, Jean-Marc Franssen
- Flexural buckling of axially loaded ferritic stainless steel columns in case of fire 989
Nuno Lopes, Paulo Vila Real, Luis Simoes da Silva, Jean-Marc Franssen
- Stability analysis of steel and aluminium columns in **fire** 995
Paulo Providencia e Costa, Fernando Cf. Gomes, JOJO Paulo C. Rodrigues
- Inelastic analysis of steel-concrete structures under fire conditions 1001
Alexandre Landesmann, Eduardo de Miranda Batista
- Experimental study on flexible end plate connections in fire 1007
ring Hu, Buick Davison, Ian Burgess, Roger Plank
- Experimental investigation of the tying capacity of web cleat connections in fire 1013
Hongxia Yu, I. W. Burgess, J.B. Davison, R.J. Plank
- Recommendations for the design of end-plate beam-to-column steel joints subjected to a natural **fire** 1019
Aldina Santiago, Lufs Simões da Silva, Paulo Vila Real
- Mechanical behaviors of shear stud in fire 1025
Yusuke Imagawa, Osamu Ohyama, A/dmitsu Kurita
- Single shear screw connections in steel shearing in **fire** - Finite element modelling 1031
Wei Lu, Pentti Mäkeläinen, Jyri Outinen

Component characterization of RHS at high temperature - Lateral faces under compression <i>Car/os López-Colina Perez, MA. Serrano-López, F. Lopez-Gayarre. F.J. Suárez-Domínguez</i>	1037
Stress dispersion through the column flange of a beam-to-column joint at elevated temperatures <i>Samantha Ongley, Amin Heidarpour, Mark Bradford</i>	1043
In-plane non-linear elastic spline finite strip analysis of thin plates at elevated temperatures <i>Amin Heidarpour, Mark Bradford</i>	1049
Non-linear behaviour of composite beams with partial interaction under thermal loading <i>Amin Heidarpour, Mark Bradford</i>	1055
Fire safety of large horizontal buildings Fire modelling and required structural fire resistance: Brazilian case <i>An/onio Moria Claret, Mareo Aurelio S. Ribeiro</i>	1061
Fire after earthquake, a natural fire approach <i>Rau/Zaharia. Don Pintea, Don Dubina</i>	1065
Failure criteria for accidental fire situation - Dependence between failure criterion and fire resistance of steel beams <i>Mariusz Maślak</i>	1071
Variation parameters of structural steel - Characteristics in fire temperatures <i>Tomasz Domański</i>	1077
 High strength steel	
High strength steels in steel construction - Application and processing <i>Ronny Willms</i>	1083
Brittle fracture of welded connections of high strength steels - Influences of strength, toughness and weldment imperfections <i>Christian Versch. Michael Vormwald</i>	1089
High strength steel fillet welded connections - Investigations on strength and ductility of lap joints <i>Ulrike Kuhlmann, Ham-Peter Günther, Christina Rasche</i>	1095
Design criteria for high strength steel joints <i>Arie Romeijn, Reza Sarkhosh, P. c.J. Hoogenboom</i>	1101
Experimental and numerical investigation of bolted shear connection in high strength steel <i>Primoj Moie, Darko Beg</i>	1107
Confinement effects and slenderness limits for square concrete-filled steel columns using high strength steel <i>Brian Uy</i>	111B
Local buckling of plates made of high strength steel <i>Tapani Ha/me, Lauri Huusko, Gary Marquis, Timo Björk</i>	1119

Numerical modelling of high strength steel column web shear panel behaviour <i>Ana Margarida Girão Coelho, Frons S.K. Bijlaard, Henk Ko/stein</i>	1125
Design rules proposal for high strength steel internal nodes with beams of different heights <i>Sandra Jordão, Luis Simões do Silva, Rut Simões</i>	1131
Mechanical and fatigue behaviour of laser and resistance spot welds in advanced high strength steel <i>Shahrokh Daneshpour, S. Riekehr, M Koçak, C.H.J. Gerritsen</i>	1137
Behaviour of dual-phase steel at elevated rates of strain <i>Venkatapathi Tarigopula, M. Langseth, A.H. Clausen, U.S. Hoppers/ad</i>	1143
Plates	
An experimental research "Ekscentro 2007" - Experimental testing of eccentrically patch loaded steel I-girders <i>Bi/jana Šćepanović, Duško Lučić, Srđa Aleksić</i>	1149
Enhanced design method for the patch loading resistance of girders with corrugated webs <i>Balázs Kovács, Benjamin Braun, Ulrike Kuhlmann, László Duna;</i>	1155
Corrugated web beams with increased web thickness <i>Hartmut Pasternak, Jürgen Robra, Volkmar Bachmann</i>	1161
Shear response of hybrid steel plate girders - Influence of the hybrid effect in the shear resistance <i>Esther Real, Rolando Chacon, Enrique Mirambell</i>	1167
Longitudinally stiffened stainless steel plate girders - Shear buckling resistance <i>Imma Estrada, Esther Real, Enrique Mirambell</i>	1173
Buckling of stiffened and unstiffened plates in compression <i>Josef Machacek</i>	1179
The maximum web slenderness of plate girders - State of the art and laboratory tests <i>Roland Abspoel</i>	1185
Practice	
Design to Eurocode 3 of pedestrian bridges - A case study <i>Dagowin La Poufre, Michael Reiterer, Alber/ Aujßerlechner</i>	1191
The home of FIFA -Innovative and economical composite construction <i>Roland Bühr/schi, Andrin Urech</i>	1197
Canopy for covering the official tribune of a stadium - Design, execution, experimental test <i>Aurel T. Ardelea, Carmen Bucur, Anca Rus</i>	1203

- Freeforms in composite constructions - The new house of music and music theatre "MUMUTH" in Graz 1209
Peter Mandl, Paul Win/er, Volker Schmid
- Water tower in the International Exhibition **Zaragoza** 2008 - An interesting combination between outstanding architecture and steel structures 1215
*Miguel **Gómez** Navarro, Iulio Martinez **Calzón, Álvaro** Serrano Corral*
- A new look at space truss supported floors 1221
Hans Scholz, Rene Spielmann
- PREON - The flexible standard in hall construction - New application of V&M tubes hot formed hollow sections 1227
Christian ZinkJer, Cornelius Dittmann
- Locked coil cables and their end connections - Product potentials and application of Eurocodes 1233
Martin Bech/old, Barrie Mordue, Friedhelm Eric Rentmeister
- Hints for designing composite beam bridges - Summary and conclusions of composite bridge designs in Hungary 1239
Zoltan Tei/er
- Refurbishment**
- Architectural ironwork in Scotland - Corrosion, coatings, cleaning and conservation 1245
*Lyn Wi/son, DavidS. Mitche/l, **Ali** Davey, Michael Pearce, Craig J. Kennedy*
