

VK Architects & Engineers offers its services to Healthcare Design and Building Engineering. VK has offices in Brussels, Charleroi, Ghent, Roeselare, Ho Chi Minh (Vietnam) and Hanoi (Vietnam).

Architects, real estate developers, industrial clients and public authorities can rely on VK for its widely recognized engineering services for their buildings, industrial facilities and public space. Our building physics, structural engineering and public space teams keep track of the newest technologies.

As knowledge company Advanced engineering plays a crucial role in our organization. Advanced engineering collects all our top experts and continuously monitors and strengthens the innovative power and technological and technical high-quality of VK's services. This is not only to the benefit of our projects and our clients, but also to our employees, who can always fall back on our know-how and expertise to further develop and upgrade their knowledge and skills.

VK offers a full range of fire safety engineering services from the design process towards detailed engineering. A few examples: Hospital Sint-Maarten à Mechelen, ZNA hospital in Antwerp, the new NATO Headquarters in Brussels, AP University in Antwerp, Treurenberg à Bruxelles, Nivelles Shopping Center, new sorting center Bpost in Brussels, Wintercircus in Ghent and Barco in Kortrijk

To extend our advanced and integrated engineering solutions with high-specialized know-how, for our Belgian offices we are looking for a (m/f) :

FIRE SAFETY ENGINEER (FSE)

Your function

As part of the team you are responsible for the design of active and passive fire safety concepts.

Projects: office buildings, public buildings, industrial buildings, ...

Your job responsibilities will include:

- Working closely with architects and engineers to combine optimum concept with a thoughtful analysis of the risks and a sustainable solution for people, property and environment.
- Consultation with the various disciplines to ensure coordinated results.
- Participation in research at universities and higher education colleges.
- VK Academy gives you the opportunity to further develop, strengthen and share your knowledge with your colleagues. This way you contribute to lever innovation within VK and enhance the quality image of VK.

Your profile

- Engineer, possibly with a relevant postgraduate or international degree in FSE - or equivalent experience.
- This vacancy is open to engineers with experience or affinity with FSE, who accept the challenge to join and strengthen the knowledge center.
- Strong affinity with architecture.
- Team spirit, excellent communication skills (both verbally and in writing) and quality orientation are important.
- Good knowledge of Dutch and/or French is required.
- Knowledge of CFD packages (such as FDS, Ansys, CFX, Fluent), evacuation packages (such as STEPS, Exodus, Simulex), zone models (such as CFast, Ozone) and others (such as SAFIR, Diana, ...) is not necessary but an asset.

Our offer

VK offers you, not only, an attractive salary package, but also a stable job within an international oriented company with a clear vision and with special attention for innovation and continuous development. You will be working on many interesting and challenging projects at home and abroad.

Discover VK and our projects online at www.vkgroup.be. More specific information about fire safety engineering at
